

# Embedded Analytics

Have analytics embedded in your app in less than 15 minutes with Zing

## Powerful and flexible integrations

- Enable powerful capabilities such as natural language querying powered by leading foundation LLMs tap to 'deep dive', interactive graphs (line, bar, pie, data table, etc) with full interactivity such as zoom / hover states / etc.
- Accelerate time to value for customers by hi-lighting the value of your product with interactive analytics.
- Unlock new revenue streams for value-added analytics.
- Zing's Javascript library and native SDK for React makes embedding robust analytics in your app fast and easy.

## Trusted by

## Embed performant dashboards with just one Embed ID

- **Full Dashboard Embedding**

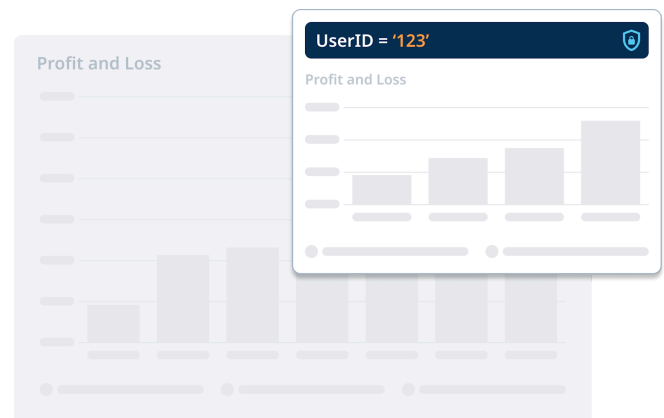

Share your entire dashboard as a cohesive unit, with a single embed id, preserving the layout you created visually within Zing. This keeps the layout / formatting of your dashboard and the charts / analyses within it without needing to recreate the layout within your app or site.

- **Individual Chart Embedding**

Embed charts individually if you want individual charts on various screens or tabs of your app and need more specific control over layout.

## User aware and secure

- **Inherit user access controls from your app** to customize end-user experiences based on chart controls.
- **Robust security** with session token authentication and row-level access.

## Built for scale

- **Save on in-house costs** of maintaining complicated data-serving infrastructure and complexities of over- or under-provisioning.
- **Zing scales to heavy analytics loads in dozens of countries concurrently** and is built to load-balance and auto-scale based on your traffic.
- **Full analytics on how your embeds are used** with the same powerful querying tools you're used to in Zing.
- **Choose updates frequently for your use case** from full-live, every minute, every 5 minutes, every 15 minutes, every 30 minutes, or every hour. Smart query checks limit database query load to only when new data is added.
